Country of origin:	USA
NSN no:	6515-01-612-7129
Tariff:	90189084
Weight Packaged:	59g

Emergency Medical Service (EMS) teams now have access to the military tested and approved C-A-T® tourniquets for their trauma scene needs.

A tourniquet makes a significant difference in a life or death situation. The C-A-T® tourniquet design offers the same benefits to EMS users as it has over the past 3 years for America's military soldiers.

It comes in a day-glo, bright orange color to provide a confirmed visual aid that an emergency tourniquet has been used on the accident victim. Easy to store (folded 15.24cm length), lightweight (59 grams) and effectively adhered during patient transport, it is a necessary medical tool for use by the trained emergency response team. Saving lives is the primary function of the C-A-T®, and it has a proven track record.
